PROFESSIONAL SUMMARY

Results-oriented professional with extensive, multi-year experience in **Tier-1 Banking Customer Service and Help Desk Support** (BCC and BNL). Recognized for strong problem-solving skills, stress resilience, and a user-centric approach to resolving complex digital banking issues across Web and Mobile App channels. Currently undergoing a dedicated career transition into **Cybersecurity and IT Support**, backed by recent specialized training (Forma.Temp course taught by Red Yard consultants), hands-on pentesting laboratories (Home Lab with Kali Linux, Metasploitable, and pfSense), and active preparation for the **CompTIA Security+** and **CompTIA PenTest+** certifications. Aiming to leverage a unique combination of technical security fundamentals and proven customer service expertise as an **IT Help Desk / Cyber Security Specialist**.

TECHNICAL SKILLS & TOOLS

- **Security & Networking:** Networking fundamentals, firewall configuration (**pfSense**), vulnerability assessment, and penetration testing. Proficient with **Kali Linux**, **Nmap**, **Metasploit Framework**, **Burp Suite**, **Wireshark**.
- **Virtualization & Labs:** Setup and management of virtual environments via **Oracle VirtualBox** (configuring and exploiting target VMs such as Metasploitable 2 & 3).
- **Systems & Containers:** Containerization principles and theoretical knowledge of **Docker**. OS administration across Windows (Client/Server) and Linux (Ubuntu, Kali Linux).
- **Software & Core Tools:** Advanced MS Office skills (Excel for data analysis), specialized banking management platforms (*BRAIN*, *EXACT*, *VISUAL PLUS*).

PROFESSIONAL EXPERIENCE

Inbound Customer Service & Help Desk Representative (Home Banking & Digital Banking) 01/2020 – 04/2026
BNL (Banca Nazionale del Lavoro) & Hello Bank!

- Provided Tier-1 technical and operational help desk support for Home Banking and Hello Bank! digital banking platforms.
- Resolved complex customer inquiries related to web/app navigation, secure credentials management, and financial transaction processing (SEPA wire transfers, direct debits, MAV/RAV, F23/F24 tax payments).
- Guided end-users through cybersecurity best practices, managing incidents related to phishing alerts, access anomalies, credential resets, and account unlock procedures.

Inbound Customer Care Representative — Payment Cards Division 09/2019 – 12/2019
ICCREA Banca Spa (via RBS - Retail Banking Services)

- Delivered specialized support for credit cards, debit cards, and prepaid cards across technical and operational domains.
- Handled account status checks, international payment authorizations, card blocking/unblocking, emergency suspensions, and web portal user reactivations.
- Utilized banking operations software including *BRAIN*, *EXACT*, and *VISUAL PLUS* daily.

Additional Customer Service & Technical Support Roles

- **Q8 Spa:** Provided Tier-1 help desk and administrative support for self-service fuel terminals, payment cards, and mobile app services.
- **ILIAD:** Delivered technical support for mobile device configurations (smartphones), cellular data connectivity, and user account portal management.
- **Infocamere:** Resolved administrative and technical inquiries for business registry and digital certificate services.
- **Carservice & Administrative/Accounting Roles:** Managed operational workflows, accounting procedures, and client relations in structured corporate environments.

IT EDUCATION, TRAINING & CERTIFICATIONS

- **Ongoing Professional Certifications (2026):** Actively studying towards earning the globally recognized **CompTIA Security+** and **CompTIA PenTest+** certifications.
- **Specialized Cyber Security Training — Forma.Temp (07/2026 – 09/2026):** Intensive 100-hour theoretical and practical program delivered by Red Yard IT consultants (Dr. Marcellino Mauriello), covering security fundamentals, attack/defense methodologies, and hands-on labs.
- **Self-Directed Learning & Practical Labs (Hack The Box & Home Lab):**
  - Completed HTB modules and earned digital badges in: *SQL Injection Fundamentals, Metasploit Framework, Active Directory & Kerberoasting, PowerShell Fundamentals*.
  - Built an autonomous **Pentesting Home Lab** in a virtualized environment (VirtualBox) featuring Kali Linux, Metasploitable 2 & 3 targets, and a pfSense firewall appliance for vulnerability testing and traffic analysis.
- **Earlier Education:** Scientific High School Diploma; Economics coursework ("La Sapienza" University, Rome); Java Developer Course (Netgroup Spa, 2019).

CORE STRENGTHS & SOFT SKILLS

- **Problem Solving & Analytical Thinking:** Methodical approach to diagnosing and troubleshooting complex technical and user issues.
- **Client Orientation & Communication:** Strong active listening, empathy, and clear technical communication developed through years of direct customer support in high-pressure banking environments.
- **Proactivity & Continuous Learning:** Highly self-motivated autodidact with a passion for staying updated on networking, system administration, and offensive/defensive security tools.
